Ph. No.	+8615600321060/+919007922929
Your Queries	How could it be possible to be associated with you in an international collaboration for any research project in the near future?
Your Suggestions	<p>The ENVIS Centre On Environmental Biotechnology (Dept. of Environmental Science, Univ. of Kalyani) is a hub for students and scientists who want to apply deep scientific thought to the earth environment and some of its most urgent problems. Geoscientists, life scientists, geographers, chemists, physicists, mathematicians, economists and lawyers come together to tackle these problems in a collaborative way. The goal is to prepare a new generation of professionals and scientists for solving the challenges ahead.</p> <p>I decided to study Environmental Sciences because the programme focuses on recent environmental issues, which is becoming a field of evermore importance. Not only the interdisciplinary approach but also the international background of one's classmates makes it necessary to reconsider one's point of view and supports the development of open-minded, flexible students.</p> <p>I believe that this centre has given me the right tools to understand the science behind nature so I could explore new ways of solving the most pressing environmental issues of today such as destruction, degradation, exploitation and pollution. The teachers are inspiring and share their fields of expertise with students, and are thus able to guide us on our</p>

	<p>chosen path. This course allowed me to build on my background experience working in the field of environmental science.</p> <p>Thank you ENVIS!</p>

Providing Information

Thursday, February 27, 2014 2:04 AM

From: "MukherjeeSantanu" <s.mukherjee@fz-juelich.de> To: "scsantra@yahoo.com" <scsantra@yahoo.com> Cc: "desku@envis.nic.in" <desku@envis.nic.in> "desku@envis.nic.in"

Dear Prof. Santra,

Thank you for your message and information . Please consider the following points as my view points for the visited ENVIS Centre

1. Students are quite interactive and it as a fruitful discussion it all of them.
2. The ENVIS centre has very nice and enriched form of documentation of all mandatory things and has informative newsletters.
3. Research areas covered by ENVIS Centre are very much pertinent to the society in terms of Environmental pollution , remediation and monitoring research.
4. Research areas covered by ENVIS are very much diverse and productive in terms of Environmental benefits i.e arsenic research .
5. Labs are equipped with all necessary consumables and skilled personals .

Thanking You.

Kind Regards,
Mr. Santanu Mukherjee

Dear Professor Santra

It was a privilege for me to deliver lecture to an expert group of dedicated and committed scientists, researchers at ENVIS and a revered environmental academic, practioner and advocate like you.

I am very much impressed with the sincerity, dedication, commitment and passion for high quality research in your team within the limited resources available to the ENVIS Centre. I have experienced multi-tasking and multiple expertise e.g. across research, analysis, experimental set up, administrative and computing in your dedicated research team within short stay at the ENVUS.

As I told you while I was at the Kalyani University that research centre like ENVIS shall continue to flourish under your leadership for the good of the environment, economy and society with appropriate financial and other resources support from funding agencies.

I wish you and all your researchers the very best!

I look forward to visiting ENVIS Centre in my next trip to Kolkata.

Kind regards

Debashis

Dear Dr. Santra,

Greetings from ENVIS CENTRE, WWF-India!

We confirm having received the ENVIS Newsletter - Volume-24, June, 2014 (hard copy) dated 16th September, 2014.

Please note that the information on "Industrial Application of Biotechnology" related issues case studies seems much beneficial. We will keep the same in our library, which will be accessed by our visitors on frequent basis.

Request you to please keep sharing such newsletter(s), this would help us/visitors to have a glimpse of current environmental issues.

Regards,
G.Areendran, Ph.D.
Director-IGCMC & IT
